Reviews

This is actually the greatest publication i have go through right up until now. I really could comprehended every little thing using this composed e book. I realized this book from my i and dad advised this ebook to learn.

(Jimmie Schmidt I)

FRANCIS CRICK: DISCOVERER OF THE GENETIC CODE

HarperCollins Publishers. Paperback. Book Condition: new. BRAND NEW, Francis Crick: Discoverer of the Genetic Code, Matt Ridley, Acclaimed author Matt Ridley traces the colourful life of the man who discovered the structure of DNA, the building blocks of life. Building on a biographical tradition that can be traced back to Aubrey's 'Brief Lives', Dr Johnson's 'Lives of the Poets' and Lytton Strachey's 'Eminent Victorians', this exciting and ground-breaking new series pairs great biographers, historians and novelists with iconic subjects, the writing bristling with original and distinctive points of view. On 28 February 1953, Francis Crick walked into the Eagle pub in Cambridge and announced that he and his American colleague James Watson 'had found the secret of life'. In fact, they had indeed done so. That morning, Crick and Watson had worked out the structure of DNA (deoxyribonucleic acid). They had discovered its 'double helix' form, one which could replicate itself, confirming theories that it carried life's hereditary information. Matt Ridley's life of Crick begins with his birth in 1916 at the home of a shoe factory owner, his early explosive experiments at primary school and time developing torpedoes in the Navy. After his seismic DNA discovery, which won him the Nobel Prize before he'd even gained a PhD, the scientist's later work was rarely uncontroversial. From California, he proposed that life began when micro-organisms from another planet were dropped here by a spaceship sent to Earth, and maintained that the 'human soul' was entirely explicable in terms of brain activity. Matt Ridley's entertaining account traces the colourful and entirely original work behind one of mankind's greatest discoveries and displays the life of a scientist considered of the very first rank.
