Excerpt: . . . illiterates, and those who can not speak English is perhaps affected by the fact that they are at the same time generally of the poorest families and are housed in the most insanitary and unhealthful part of the city. AGE. The age of the mother is frequently believed to be a factor in the health of the child. The highest infant mortality rate was found to be that for the group of babies with mothers over 40 years of age, and the lowest for babies of mothers from 20 to 24 years of age. Table 16. -- Distribution Of Births And Of Deaths During First Year, Infant Mortality Rate, And Number And Per Cent Of Stillbirths, According To Age Of Mother. The youngest mothers have a higher stillbirth rate than other mothers, and the oldest group of mothers has the next highest rate. In...
