---

By George Lee Servoss

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: .as we get a correct conception of the constitution and function of the blood plasma and as far as we may trace local chemical anomalies of rheumatics by Sufficient clinical analyses, we will be successful in our search for scientific ideas about the treatment of rheumatism. Particularly salicylic acid and its chemical derivatives are very weak antiseptics, but powerful enough for a restricted antiseptics within the intestines and neighbor organs, without remarkable local harm. This local antiseptic influence of salicylates enables them to become antirheumatics where the rheumatism is a peripheric paraesthesia of an abdominal pathological infection. Salicylic acid or its derivatives never circulate in a sufficient concentration to influence peripheric muscles and their own local sensations. It concerns the blood of the vena porta principally. The chemical constitution of the blood is the basis too, for the perception of treatment of rheumatism in this new...
